B.S. HOTEL & RESTAURANT — ADMIN DASHBOARD BLUEPRINTS

Operational Architecture & Management Portal Wireframes

Document: Admin Wireframe Suite
Date: November 2026
Client Presentation Ready

BLUEPRINT 1: OVERVIEW & DAILY OPERATIONAL METRICS

Central management dashboard with 8 KPI counters, 7d/30d revenue trends, and real-time urgency queue.

8 Core KPI Cards: New Bookings, Today's Check-ins, Check-outs, Occupancy (8/22), Orders, Revenue Today (₹14,250).

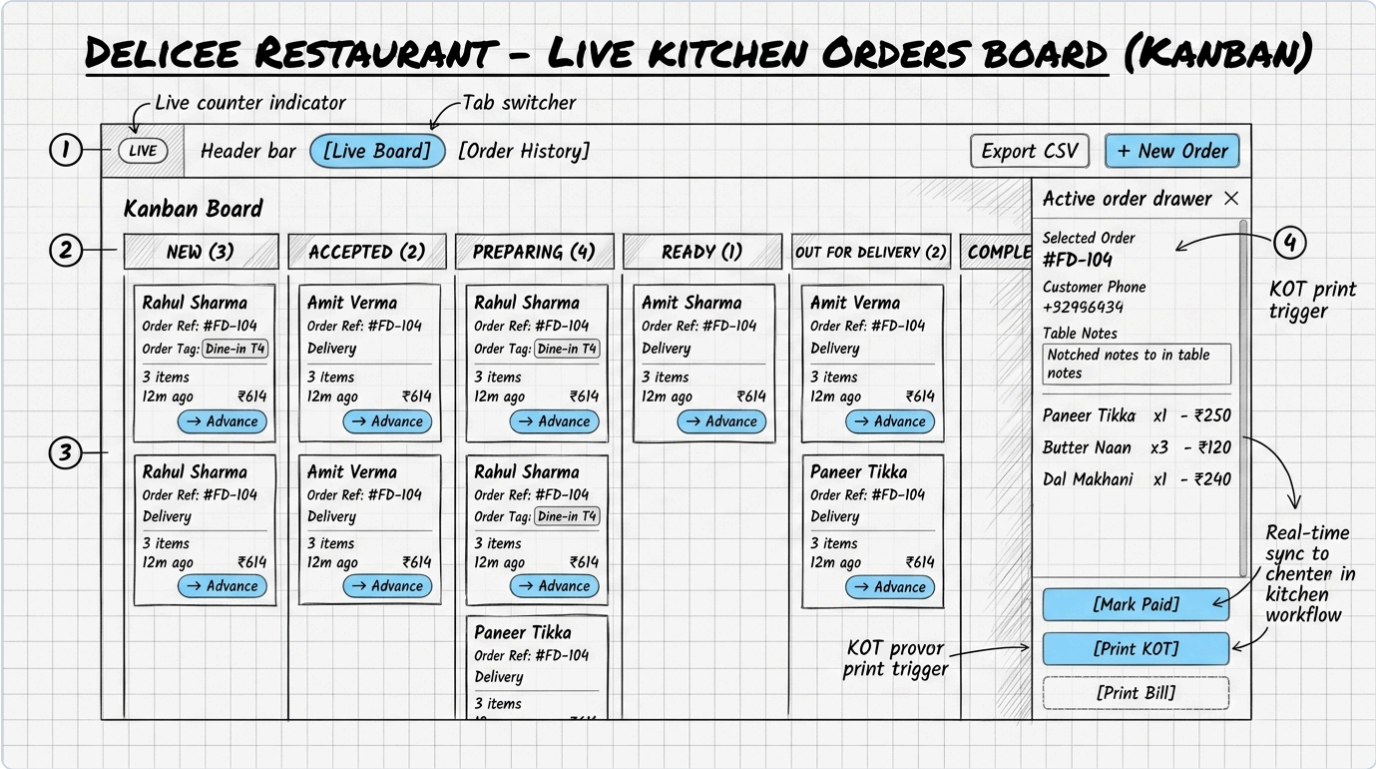

Quick Actions: [+ New Booking], [+ New Order], [Block Dates], [+ Add Dish] buttons.

Live Trends: Recharts line graph for revenue progression and daily order volume bars.

Needs Attention: Immediate actionable alerts for pending room bookings & kitchen queue.

BLUEPRINT 2: DELICEE RESTAURANT LIVE KITCHEN BOARD (KANBAN)

Real-time 6-column pipeline managing food orders from website/phone to chef preparation and dispatch.

6 Pipeline Stages: New → Accepted → Preparing → Ready → Out for Delivery → Completed.

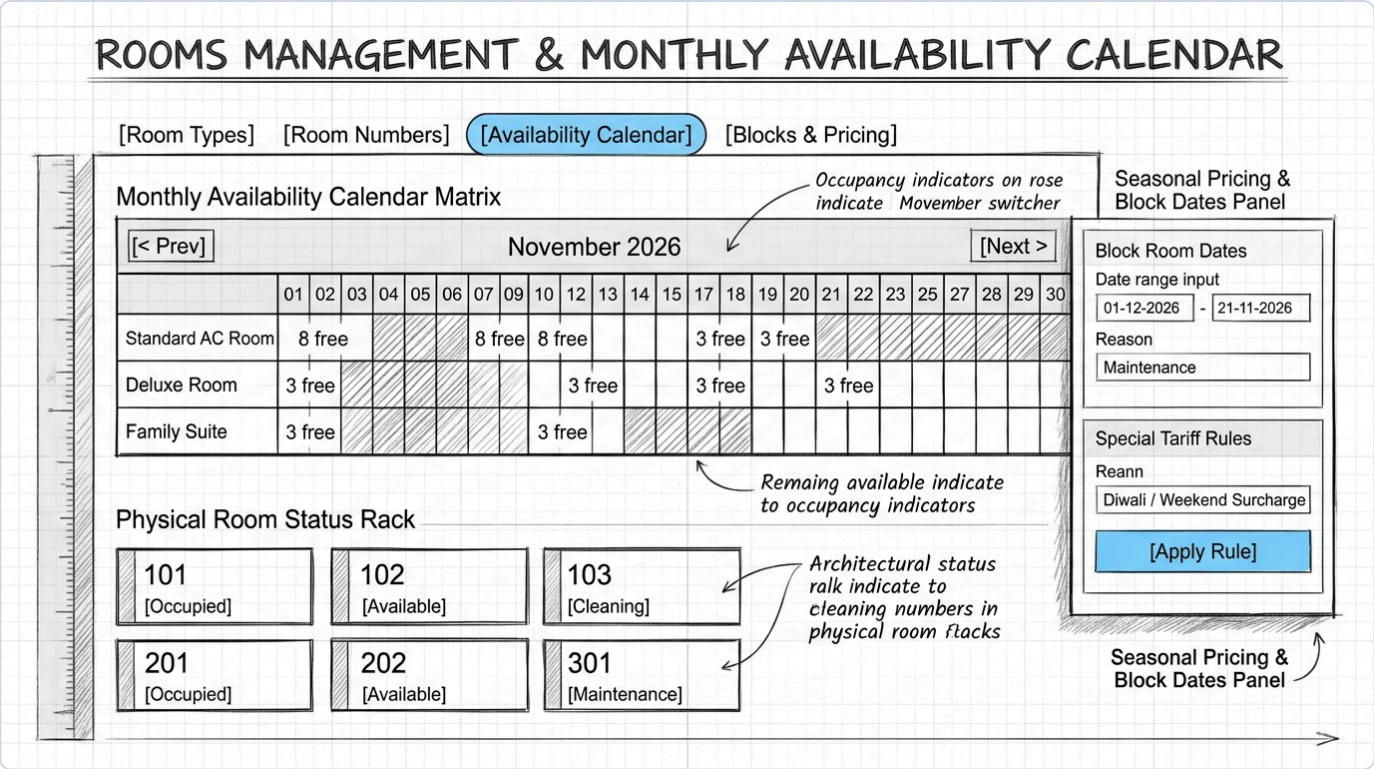

Instant Printing: Dedicated triggers to print KOT (Kitchen Order Ticket) and Customer Bill.

Fulfillment Metadata: Supports Dine-in (Table #), Takeaway, and Local Highway Delivery.

Payment Integration: Direct [Mark Paid] button with cash/UPI mode tagging.

BLUEPRINT 3: ROOMS INVENTORY & AVAILABILITY CALENDAR

Full 31-day room matrix showing live remaining availability, physical room status, and blackout date controls.

31-Day Matrix: Standard AC, Deluxe, and Family Suites with free room count per day.

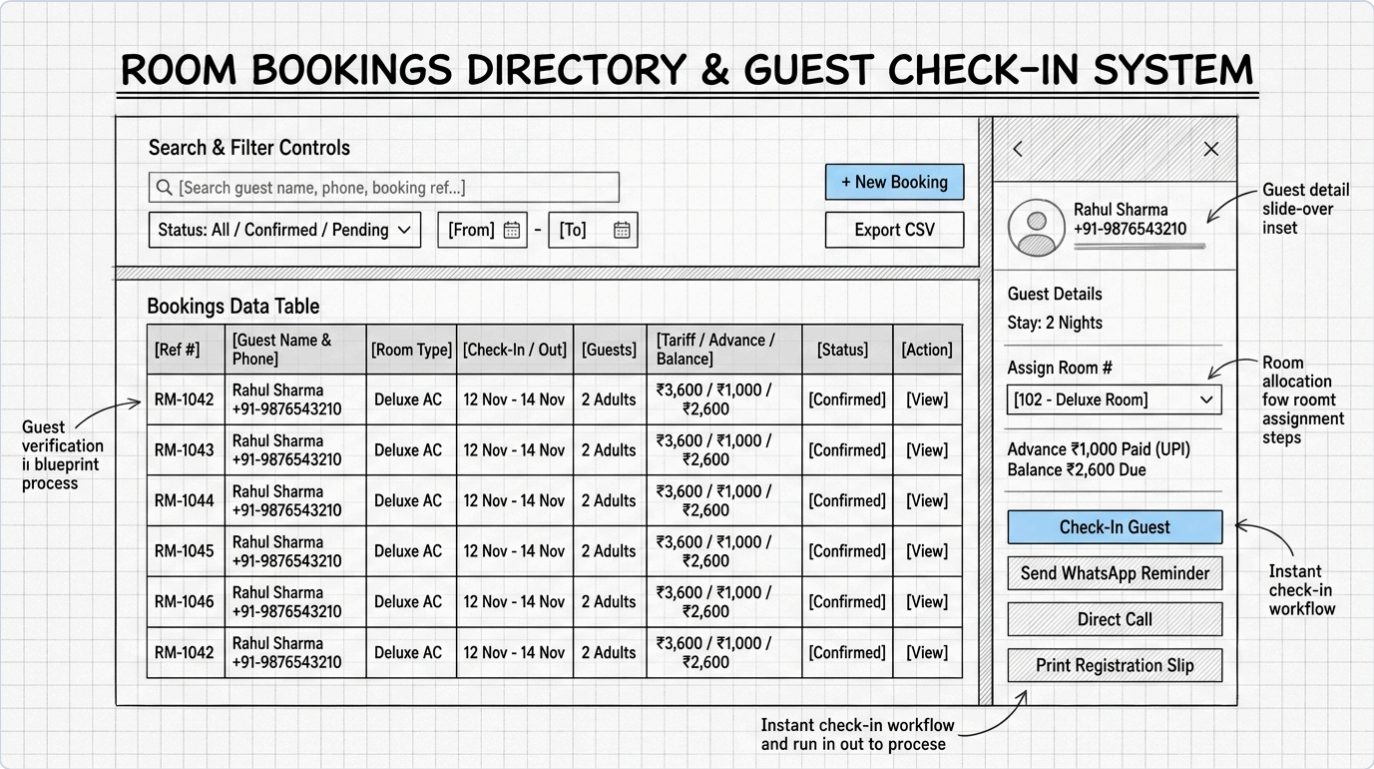

Maintenance Blackout: Block specific dates for annual maintenance or private events.

Physical Room Rack: Room tiles (101, 102, 201...) tagged Available, Occupied, Cleaning, Maintenance.

Seasonal Pricing Rules: Set festival / weekend surcharges with automatic rate recalculation.

BLUEPRINT 4: BOOKINGS DIRECTORY & GUEST CHECK-IN SYSTEM

Comprehensive reservation book with faceted search, balance tracking, and one-click room check-in allocation.

Filterable Ledger: Search by Guest Name, Phone, Ref (RM-XXXX), and booking status.

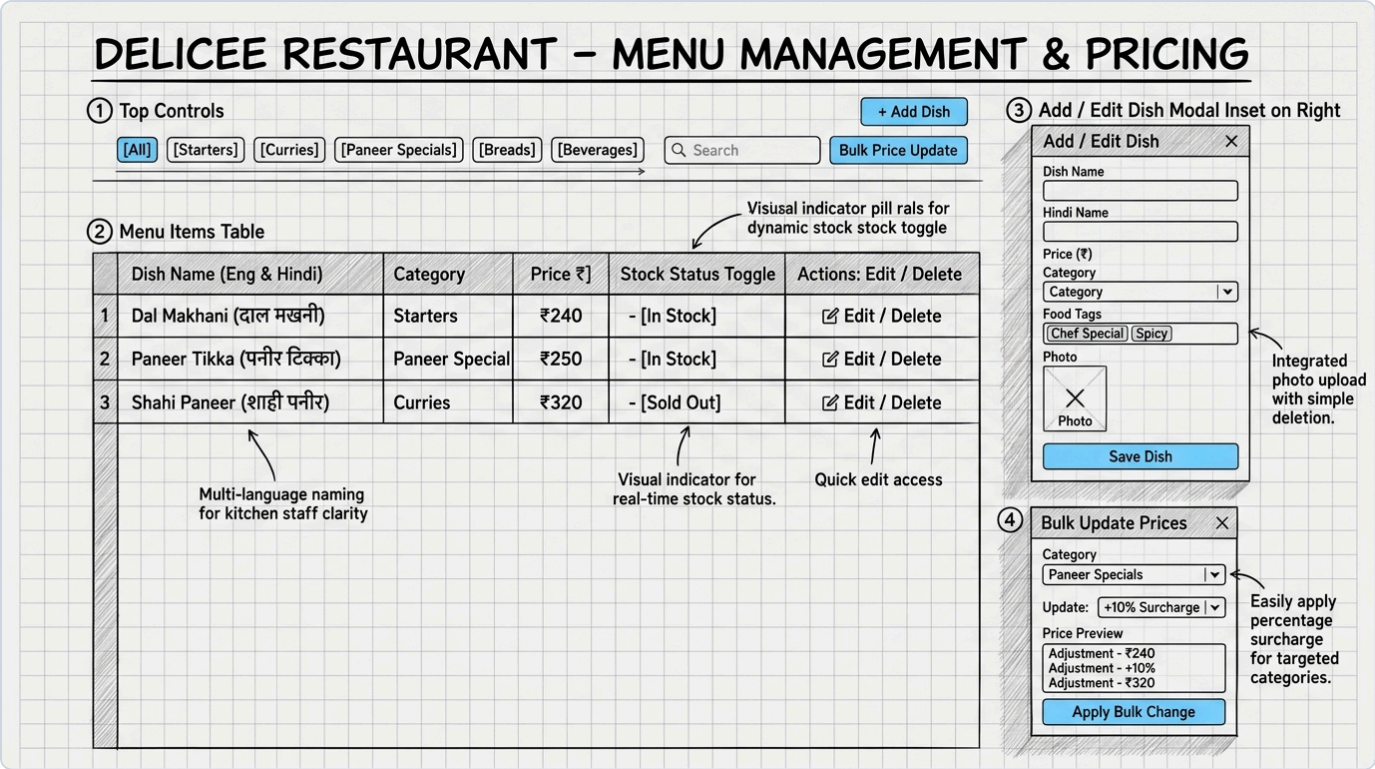

Room Allocation: Dropdown to assign guests to exact physical rooms (e.g. Room 201).

Tariff Tracking: Clear visibility of total tariff, advance deposit received, and balance due.

Direct Communication: One-tap WhatsApp confirmation link and Phone call integration.

BLUEPRINT 5: DELICEE MENU MANAGEMENT & BULK PRICING

Live menu administration with instant in-stock toggles, bilingual naming, and bulk price percentage adjustments.

Bilingual Display: English and Devanagari Hindi dish names for seamless staff usage.

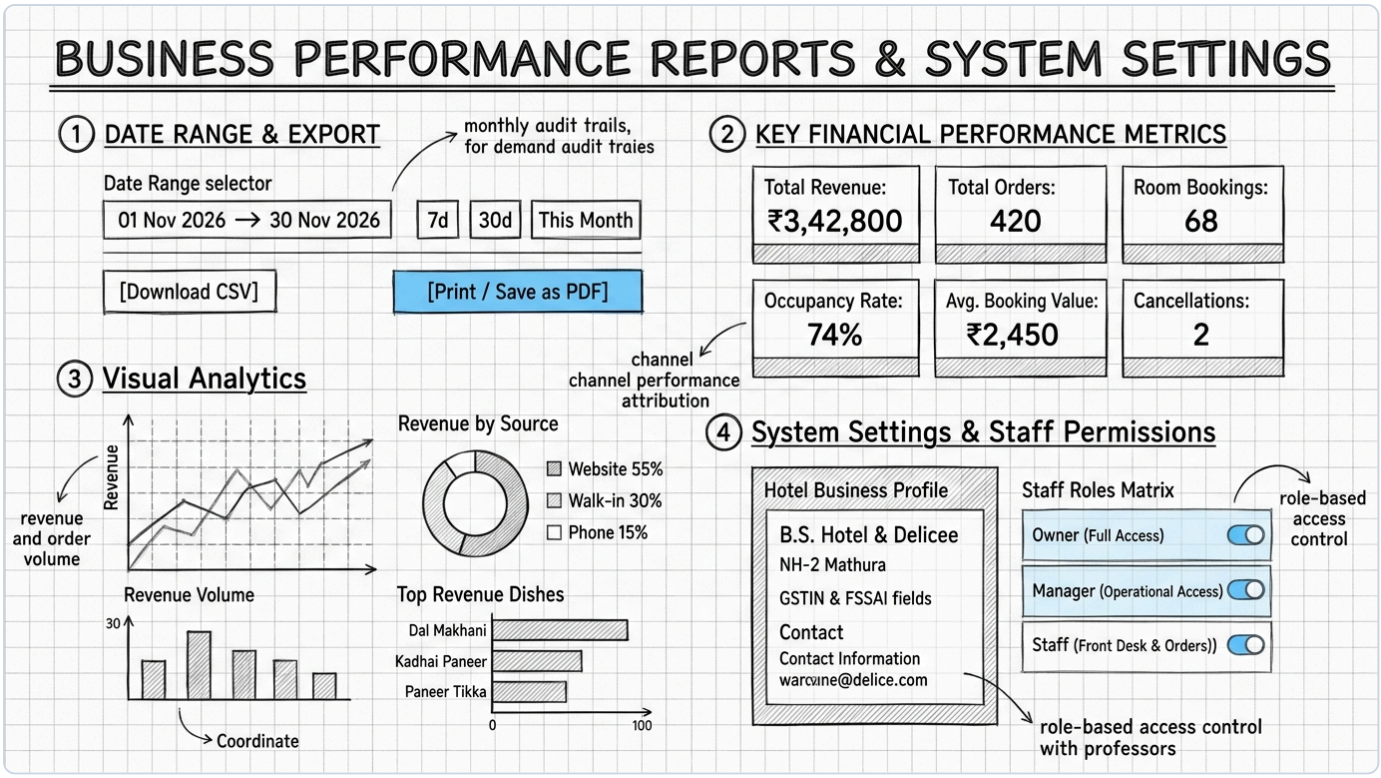

Instant Stock Switch: Toggle dishes in/out of stock instantly to prevent ordering unavailable items.

Add / Edit Dish Drawer: Configure prices, descriptions, spice tags, and category assignments.

Bulk Price Controller: Adjust entire categories by +10% or +₹20 simultaneously in one click.

BLUEPRINT 6: BUSINESS REPORTS & STAFF ACCESS PERMISSIONS

Financial ledger, occupancy rate analytics, exportable PDF/CSV reports, and multi-tier staff role access.

Key Metrics: Total Revenue, Total Food Orders, Room Bookings Count, Average Occupancy %.

Channel Distribution: Revenue breakdown by Website Direct vs Walk-in vs Phone orders.

Exporting: One-click [Download CSV] and [Print / Save PDF Report] for accountant audits.

Staff Role Matrix: Owner (Unrestricted), Manager (Operational), Staff (Front Desk & Orders).
